WETTASK® with BacilloI® 25 Wiping System (Pre-saturated)

Convenient instant disinfection in 25 seconds : Aldehyde free, containing corrosion inhibitors.

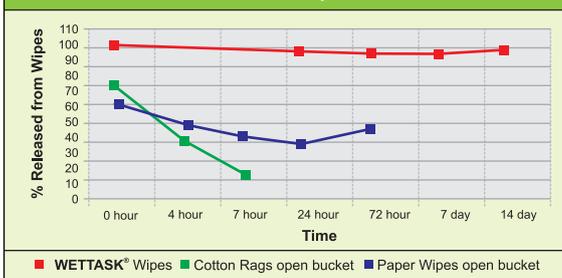

Salient features:

- **BacilloI® 25** : Aldehyde free surface disinfectant wipes, effective against bacteria, fungi, viruses, including HIV, Rota, Herpes etc.
- **WETTASK®** wipes are made from special Melt Blown Polypropylene based sheet, lint free, tear proof, researched material. It releases upto 90% of active disinfectant, on the surface, to ensure effective disinfection. Polyester fibers RELEASE MORE liquid than Cellulose fibers.
- **WETTASK®** wipes, pre-soaked in **BacilloI® 25**, a time tested, rapid instant disinfectant, for uniform application for surface disinfection.

Why WETTASK® wipes in a 'closed bucket system'?

- For controlled chemical usage and target disinfection.
- Closed bucket system' for total hygienic disinfection.
- Reduces exposure to chemical vapors and splashes.
- Complies with Guidelines of Infection Control Health Care Facilities (CDC — USA).
- Picks up maximum dirt (documented).
- Leaves no residue.
- APIC cautions: Re-using a used cloth, will definitely promote contamination and microbial spread.
- No laundering of rags, no disinfection of contaminated mops, no exposure to chemicals.
- No wastage of time.
- Compared to the spray technique, this gives special target disinfection, with no wastage.

Comparison of, % of disinfectant released, from WETTASK®, and Cotton Rags Over 14 Days

Cotton Rags shows 53% lower release than Wettask.
BacilloI Wettask shows more than 85% release consistently.

Composition

Each 100gms of **BacilloI® 25** contains :

- Ethanol : 10 gms
- 2-Propanol : 9 gms
- 1-Propanol : 6 gms
