99.99% ELIMINATION

of air-borne viruses, bacteria and other
pathogens in post application challenge tests

Virosil F&B is ideally suited for the Food & Beverage industry due to its unique properties of being a colourless, odourless and tasteless liquid disinfectant. Virosil F&B can be used where other chlorine-based disinfectants have failed.

Our unique formulation features a combination of two elements to create a synergistic impact in killing all forms of bacteria, fungi and viruses by oxidizing the bio-film, and penetrating and attacks the bacterium cell completely.

VIROSIL'S FAST VIRUS KILLING ACTION

Virosil is a combination of H₂O₂ and Silver Ions. It neutralizes all forms of viruses and bacteria by attacking their cell membranes and their DNA/RNA structures. It can be used for aerosol and surface decontamination applications. This results in effective elimination with no risk of microbial resistance.
